

MolPharm posters

The call was primarily for CABS abstracts but the following have also been submitted and will be shown during the MolPharm Workshop (Saturday and Sunday) and during the poster reception on Sunday 18:00-19:00

MP1

Skp2 inhibits osteogenesis by promoting ubiquitin–proteasome degradation of Runx2

Gatha Thacker (Lucknow, India)

MP2

Iron accumulation leads to bone loss by inducing mesenchymal stem cell apoptosis through the activation of caspase3

Ye Yuan (Suzhou, China)

MP3

Teriparatide use among post-menopausal women: A meta-analysis

Cristina C. Morales (Quezon City, Philippines)

MP4

Denosumab-like anti-RANKL treatment reverts osteolytic and osteomalacic changes in a murine model of fibrous dysplasia

Biagio Palmisano (Rome, Italy)

MP5

Visualization of immune response during initiation and progression of heterotopic ossification in mouse model of fibrodysplasia ossificans progressiva (FOP)

Sarah Hatsell (Tarrytown, USA)

MP6

Paget's disease of bone: are we missing something?

Geetha Lakshmi Janakiraman (Middlesbrough, UK)

MP7

Variation in RIN3 is associated with the onset and severity of Paget's disease and bone.

Raphaël De Ridder (Antwerp, Belgium)
